

Dear Hiring Manager,

Are you looking for a skilled, reliable, and professional engineer? I hope my CV will give you a clue. I am Linh-An, a researcher in Ireland. I received my PhD degree in Information and Communication Engineering from Chungbuk National University, Korea, in 2022. Before entering graduate school, I worked as a software engineer at Samsung Vietnam Mobile R&D Center, Hanoi, from 2013 to 2017. Currently, I am looking for a full-time/part-time freelancer software developer job.

So, how my qualifications will fit your requirements? Let me briefly tell you about my journey. At Samsung, I was fortunate to work in several roles (i.e., project management, automation test team leader, system engineer). These roles help me earn experience in project management, Android and Linux operation system, C++, Java, and Python programming. During my PhD, as the only PhD student in the lab, I have covered all research projects of the lab, including those related to the Internet of Things, future network technologies, and cloud/edge computing. I built a smart IoT gateway, designed synchronization protocols for wireless sensor networks, and proposed new features for cloud/edge computing systems. I have been using C++ and Python during last five years in various projects. I have knowledge about network protocols, database, back-end, distributed, and cloud systems, etc. Doing PhD helps me improve not only technical skills but also other professional skills, especially self-learning, problem analysis and solving. I am confident that I can quickly adapt to a new role and significantly contribute to your project.

I love solving real-world problems and building scalable systems/products. I am eager and willing to learn new knowledge, expand my skills, and collaborate with excellent colleagues. I believe that my biggest strengths are quick self-learning, critical thinking, and adaptability. I guess it will be boring for you to read about me through a long resume, so why don't we try a better approach? I am very happy to tell you more about myself and discuss my qualifications for the position in a personal interview.

I look forward to hearing from you. Thank you for your time reviewing my resume.

Sincerely,

Linh-An Phan
